Your investors and your institution need protection against the possibility of servicer insolvency or a servicer not performing up to standards. Even if your servicing operations are running smoothly, a back-up servicer may be a part of your investor requirements. You need a back-up servicer in place that can step in and assume your operations should the situation call for it.

defi SOLUTIONS has the ability to respond swiftly and scale efficiently and effectively to the size of your portfolio. defi partners with you to provide the skills, know-how, and, most importantly, an attention to detail that ensures your response to trigger events and compliance with investor and regulatory requirements.
